

COPENHAGEN LIGHT FESTIVAL

COPENHAGEN LIGHT FESTIVAL 2024 announces the complete programme for February 2 through 25

With great support from funds and collaboration partners, Copenhagen Light Festival 2024 is now able to unveil this year's programme featuring spectacular, glimmering light works from a strong selection of national and international light artists and designers.

BRON by Båll & Brand (DK) at Knippelsbro. The festival's unique beams of light support the functionalistic expression of the angles of the bridge. More than 50 light works will be active every day from 5 p.m. to 10 p.m. **Illustration by Båll & Brand**

Copenhagen Light Festival across the city

On Friday, February 2nd at 5 p.m., Copenhagen Light Festival turns on the light of more than 50 light works in the darkness across the districts of Copenhagen – in the streets, alleyways and plazas, by the water and in the parks.

Jesper Kongshaug, chairperson of the Copenhagen Light Festival Association:

“I am pleased by the fact that in this year’s programme, we have been able to include a wide range of light works from both Danish and international artists, designers and students, whose expressions ranges from fascinating light projections and interactive, inquisitive installations to beautiful and personal light works.

We look forward to Friday, February 2, allowing citizens and guests from all over Denmark and abroad to venture into Copenhagen and explore the festival programme at no cost throughout three weeks and four weekends. This is made possible every year through close collaborations with the Copenhagen Municipality as well as several Danish foundations, cultural institutions, and partners. The Copenhagen Light Festival Association is very thankful for the continuous support.”

Vivid Verve by Vibe Lundemark (DK) will be placed in Jorcks Passage. In this light work, past and present are woven together in an international meeting between 230 years of Japanese lantern craftsmanship by Kojima Shoten and Vibe Lundemark’s modern, digitally printed patterns, hand-painted colour gradients and unifying reflections in Swarovski crystal details. **Photo by Vibe Lundemark**

Join Copenhagen Light Festival in the dark February nights

Discover the beautiful light works with friends and family: [COPENHAGEN LIGHT FESTIVAL PROGRAMME 2024](#)

Explore downtown Copenhagen, Refshaleøen, Ørestad, DR Koncerthuset, Vestre Kirkegård, Nordhavn and other districts of Copenhagen through the period of February 2nd-25th – every day from 5 p.m. to 10 p.m.

Walking, running, biking and bus routes is to be found at the festival map, which will be posted online and in the app on February 1st.

You can already experience four amazing light works every night at Vestre Kirkegård. Watch along here: [Kickstart at Vestre Kirkegård 2024](#)

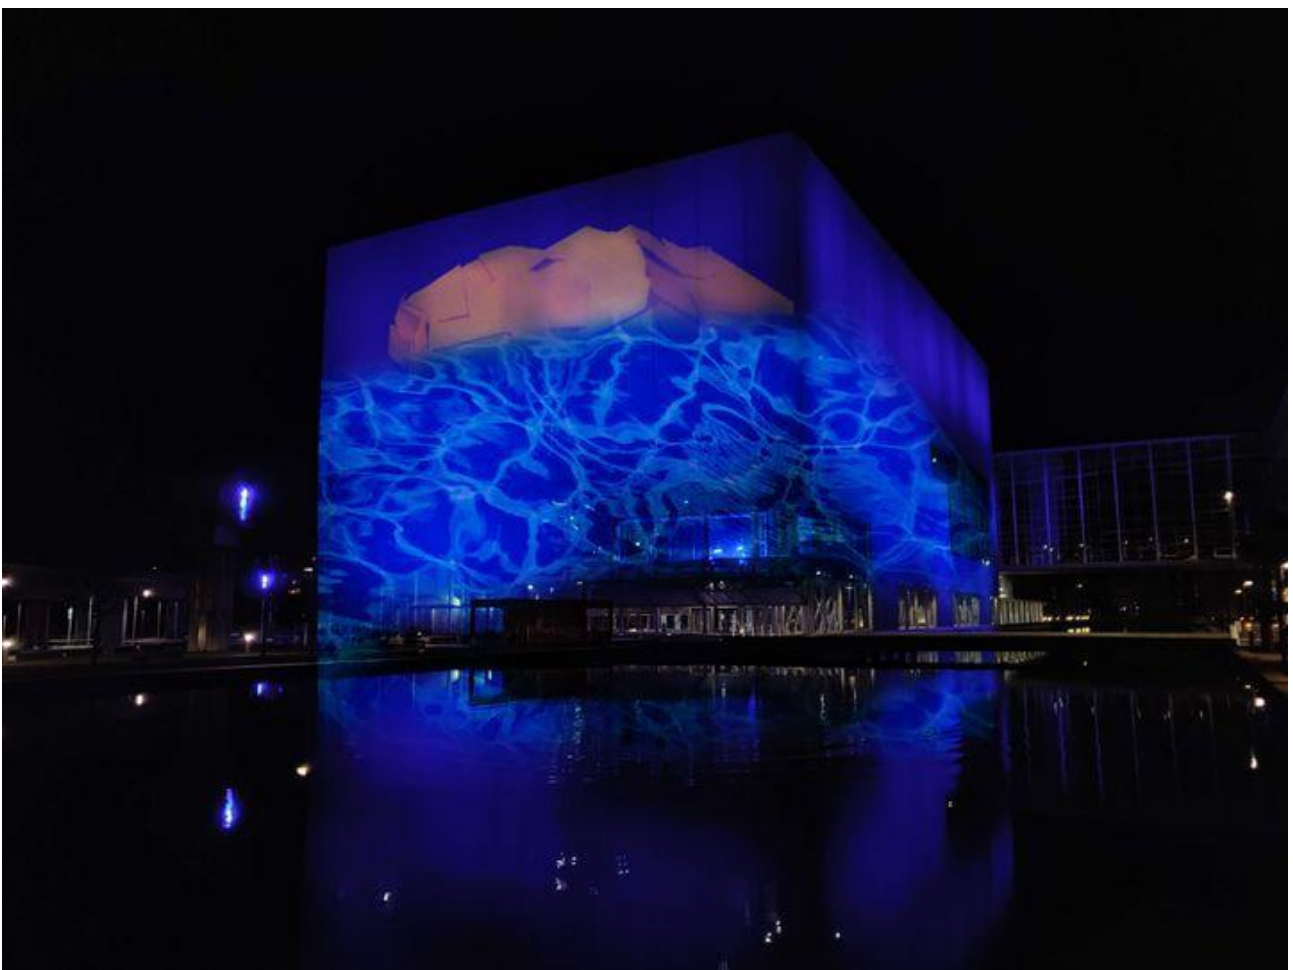

Mycelium Network by Stevie Thompson, Custom Fibre Optics (UK). In this custom-built installation in Øens Have at Refshaleøen, luminous mushrooms slowly change colours and pulsate, as if communicating with each other. **Photo by Stevie Thompson**

Additional light experiences and events to look out for

In the programme at copenhagenlightfestival.org, you will also find a list of events taking place during the festival, including a series of concerts by the DR Vokalensemblet choir in Marmorkirken, the Opening Concert at Holmens Kirke by Mogens Dahl Kammerkor as well as the running events Lysløbet and Familieløbet, which takes off at Ofelia Plads. The event programme is updated continuously during the festival.

This is where you will also find additional information and links to social evening walks and descriptions of additional light experiences in the city – such as the lighting in the windows at La Glace or at Relæet at Nørrebro.

Unorbit by stage designer and architect Elisabeth Holager Lund (NO/DK) and pianist and composer Christoffer Møller, with audio by DR Vokalensemblet, placed outside DR Koncerthuset. As part of events taking place during Copenhagen Light Festival, concerts are arranged on February 22nd and 23rd by the DR Vokalensemblet choir in Marmorkirken,. **Photo by Elisabeth Holager Lund**

COPENHAGEN | LIGHT | FESTIVAL

About Copenhagen Light Festival

Copenhagen Light Festival is an annual light festival that transforms the quiet and cold winter darkness into a unique celebration of light art, lighting design and illumination in the center of Copenhagen.

In three weeks of February the festival presents a wide range of light based works – such as sculpture, installation, projection mapping, event and illumination created by both established and upcoming light artists, lighting designers, students and organisations.

With a tailored light program selected by a curatorial committee, the festival exhibits, accentuates and interprets the city's different spaces, squares, facades, bridges and hidden places in a new and engaging way.
